

Writing SMART: Action Items Based on Metrics

Objectives

- Learn about the PDP and how it can be utilized as a source for building SMART goals
- Build a SMART goal for implementation using a KPI

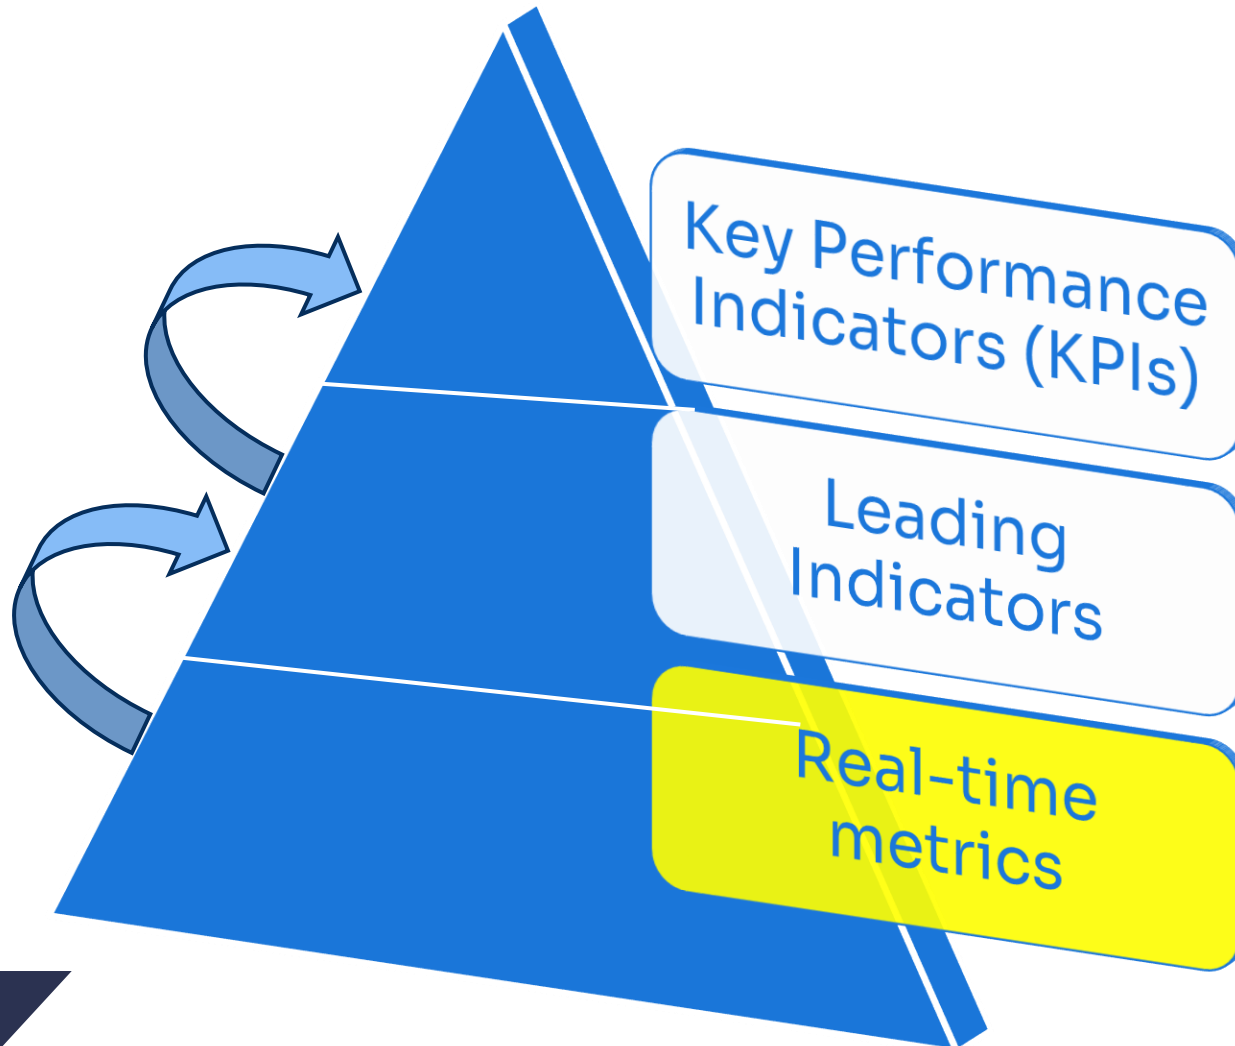

Measure What Matters

Structuring Data:

KPIs, Leading Indicators, and Real-Time Metrics

- KPI-level: Changes over years.
- Potentially includes annual review cycle

- Changes every semester
- Informs changes in approach, operations, project selection

- Changes every day, week, bi-weekly
- Subject to frequent, action-oriented conversations

Choose the best KPI's to align with your mission, needs, and capacity

- Metrics that align with your college's strategic plan
- Metrics derived from best practice
- Metrics about your college you already make public

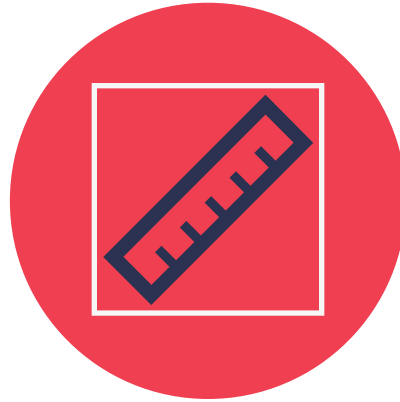

Example: KPIs Brainstorm

A	B
Identify KPIs	
Brainstorm KPIs	6 to 10 KPIs
Graduation Rates	Graduation Rates
Retention Rates	Retention
Median Earnings After Graduation	Transfer
Transfer Rates	Median Earnings After Graduation
Employment Rate in Field	Enrollment
Student Engagement	Student Engagement
Enrollment	KPI 7
Number of Degrees Awarded	KPI 8
Classroom Engagement	KPI 9
Instructional Cost	KPI 10
Course Completion Rates	
Student Outcomes	
Acceptance Rates	
Advising

Disaggregate and dig into the data

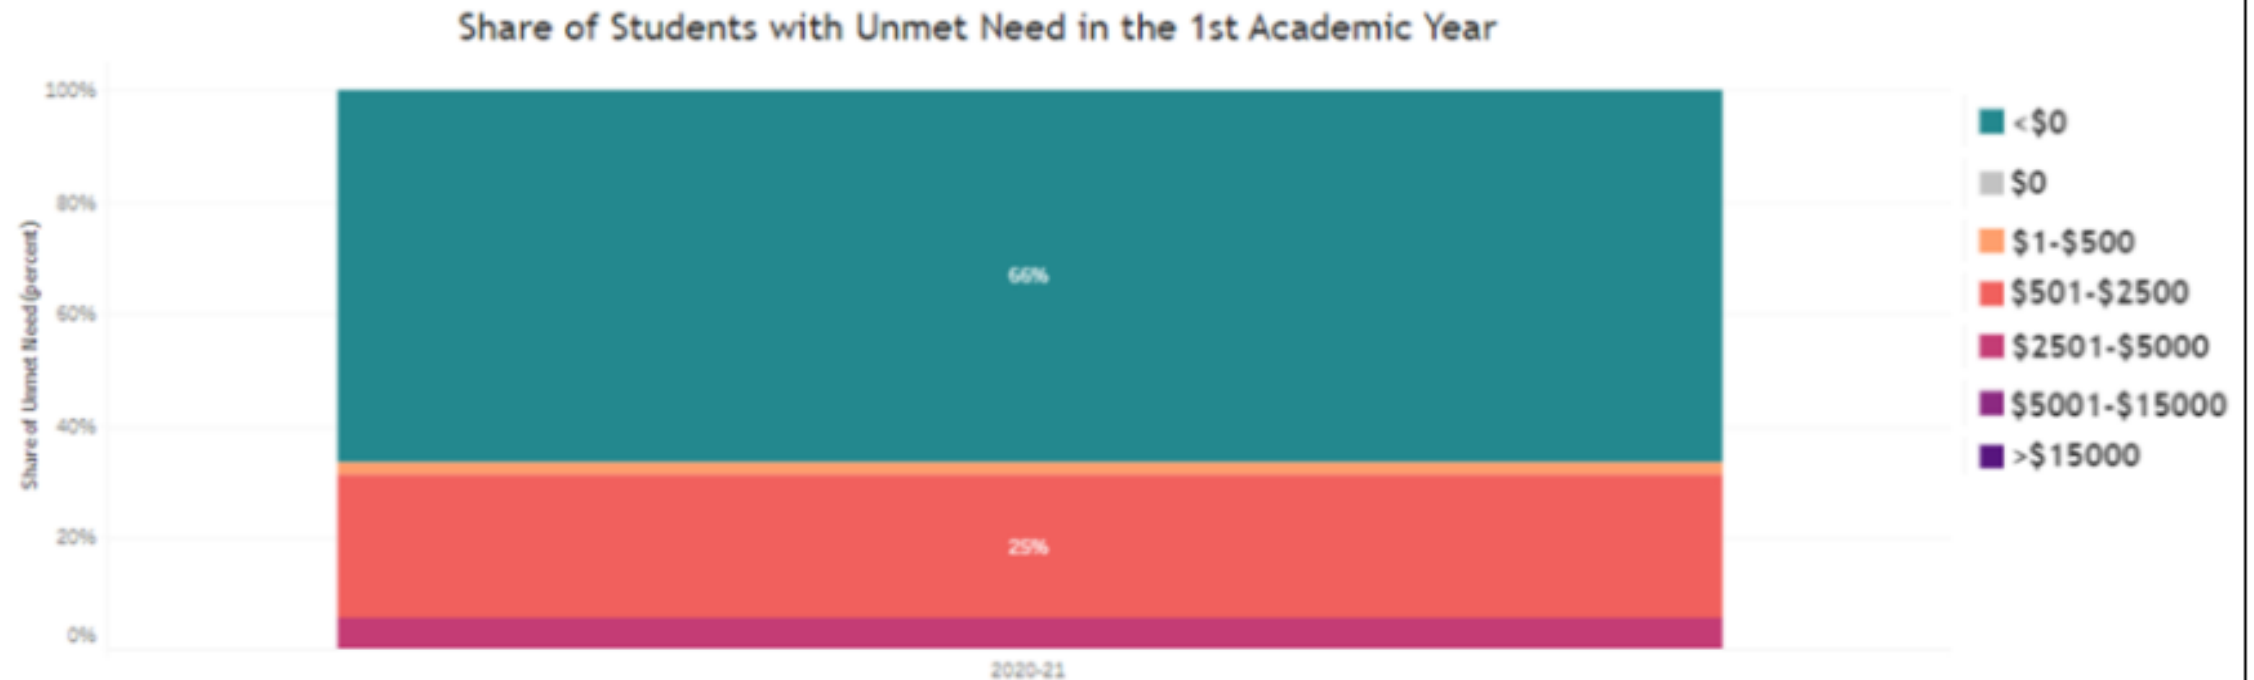

The Enrollment Dashboard

- The dashboard calculations include only undergraduate students who enrolled for the first time at your institution either by transferring in or as their first time enrolling in college.
- The First-Year Enrollment dashboard shows 12-month enrollment counts and key characteristics by cohort year for students enrolling at your institution for the first time.

The Financial Aid Dashboard

- Review the percentage of students within a certain range(s) of unmet need changed from one cohort to the next for the selected academic year.
- This allows you to see whether students moved between unmet need ranges across cohorts and, for a single cohort, what percentage of students fell within certain ranges of unmet need.

The Credit Accumulation Rate Dashboard

- Reports how successful students are at completing enough credits for satisfactory progress.
- Helps clarify which students are (or are not) gaining academic momentum early to identify which students need support.

2019-20	15.0%	65.0%
2020-21	5.0%	45.0%
2021-22	5.0%	60.0%
2022-23	5.0%	60.0%

14

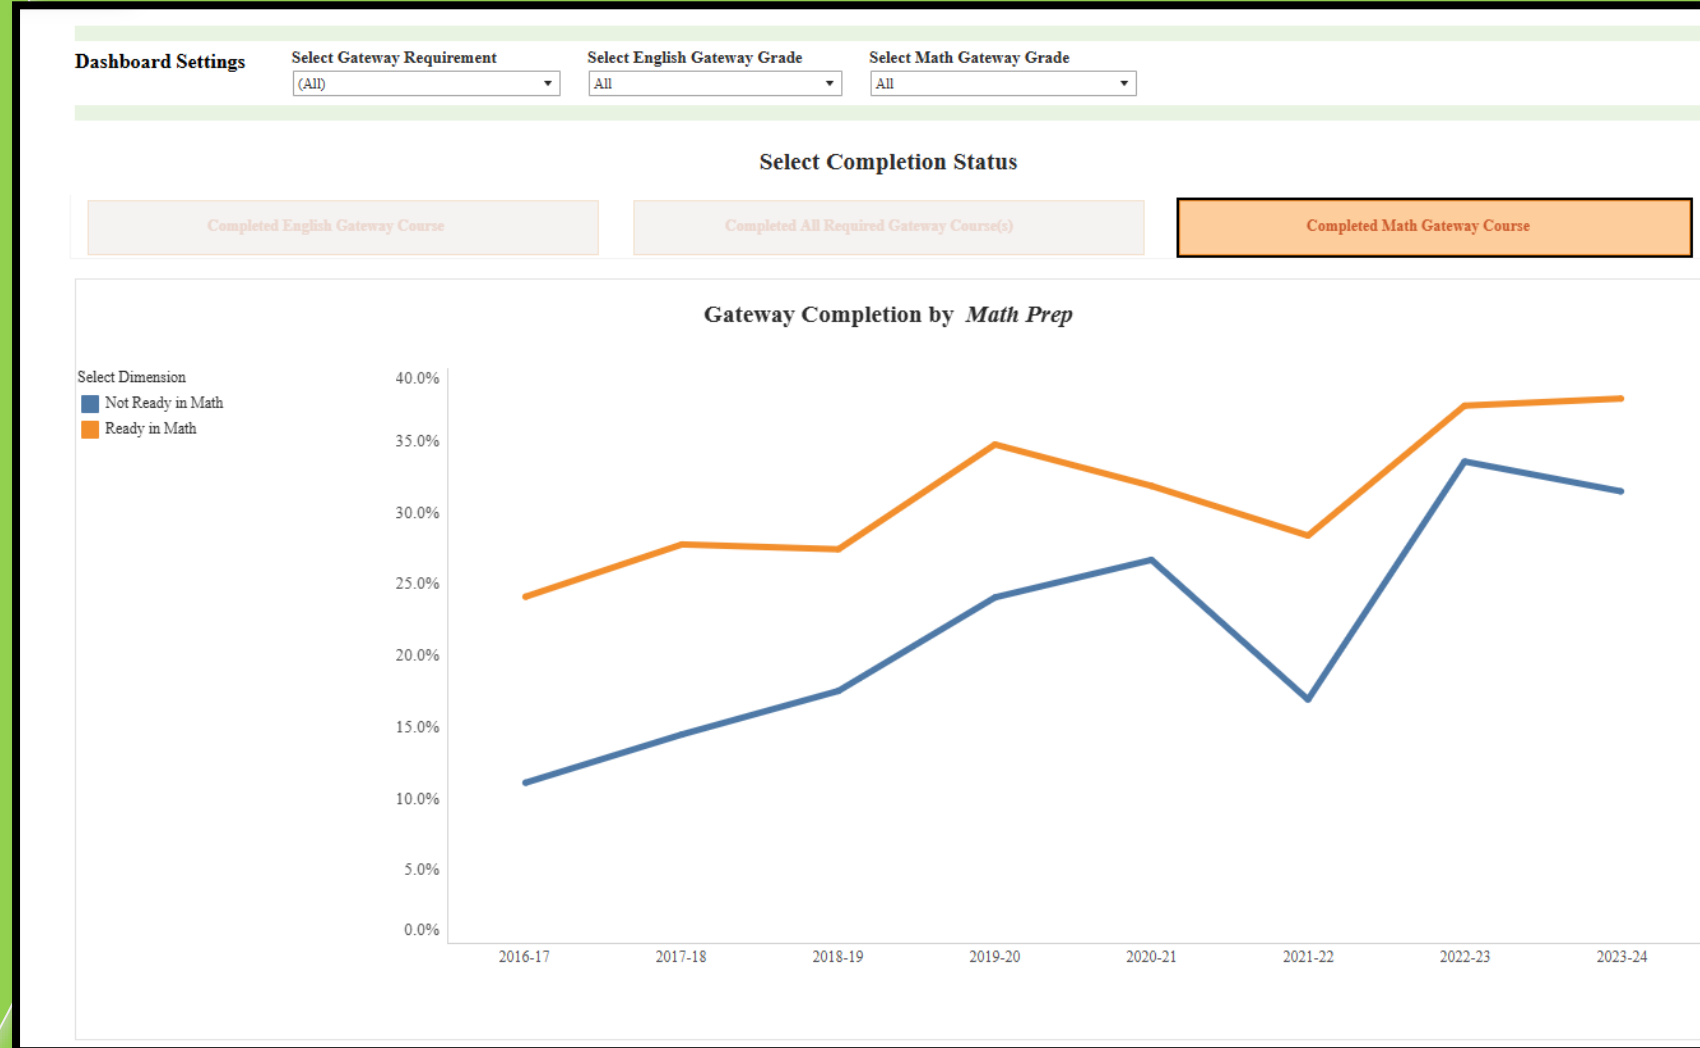

The Credit Completion Ratio Dashboard

- Shows student success at completing the credits they attempt in their first year.
- First-year completion ratios can help you identify student populations that need early intervention.

The Gateway Dashboard

- This dashboard can help you determine, assess, and address any gaps in gateway course completion, a critical leading indicator of on-time credential completion.
- Views by completed English, Math, or both English and Math.

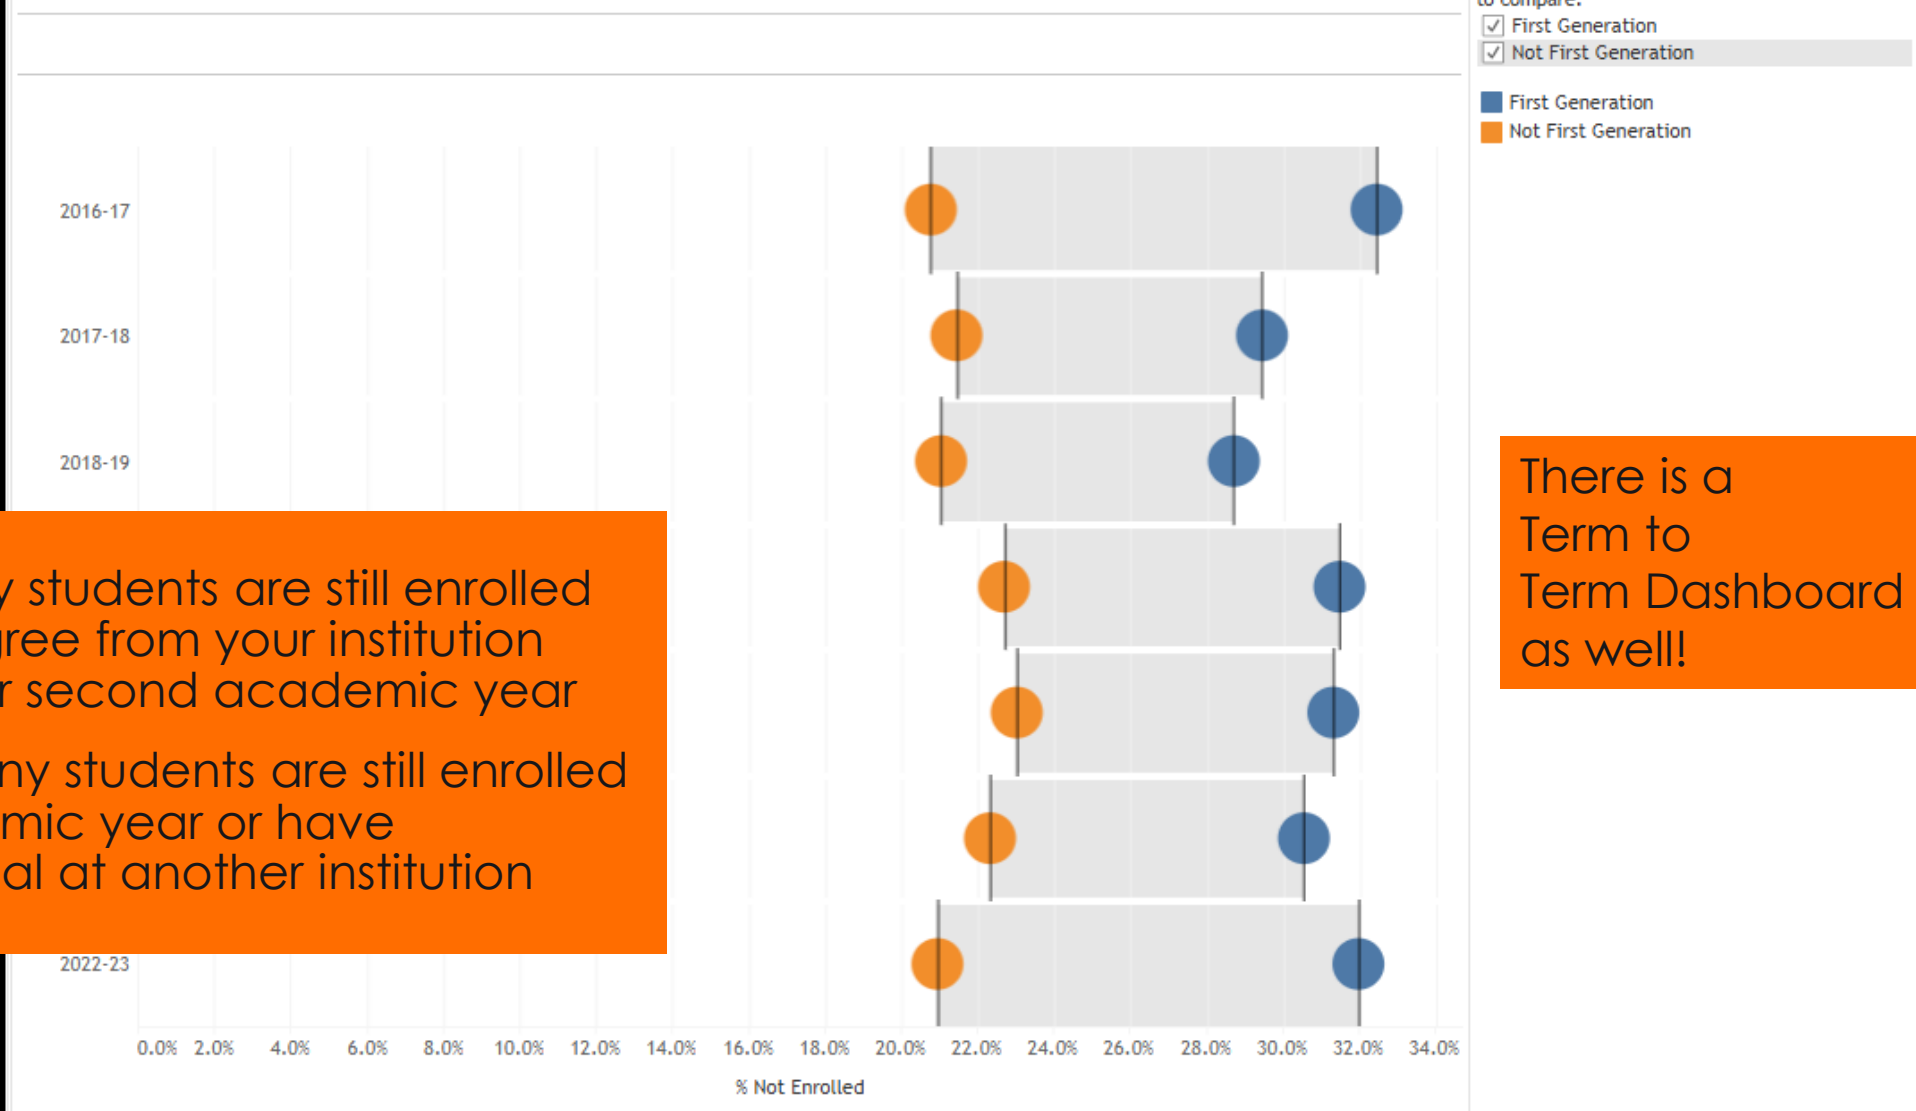

The Retention & Persistence Dashboard

- Retention = How many students are still enrolled or have earned a degree from your institution before the end of their second academic year
- Persistence = How many students are still enrolled in their second academic year or have completed a credential at another institution

How have retention/persistence gaps between student subgroups changed from cohort to cohort?

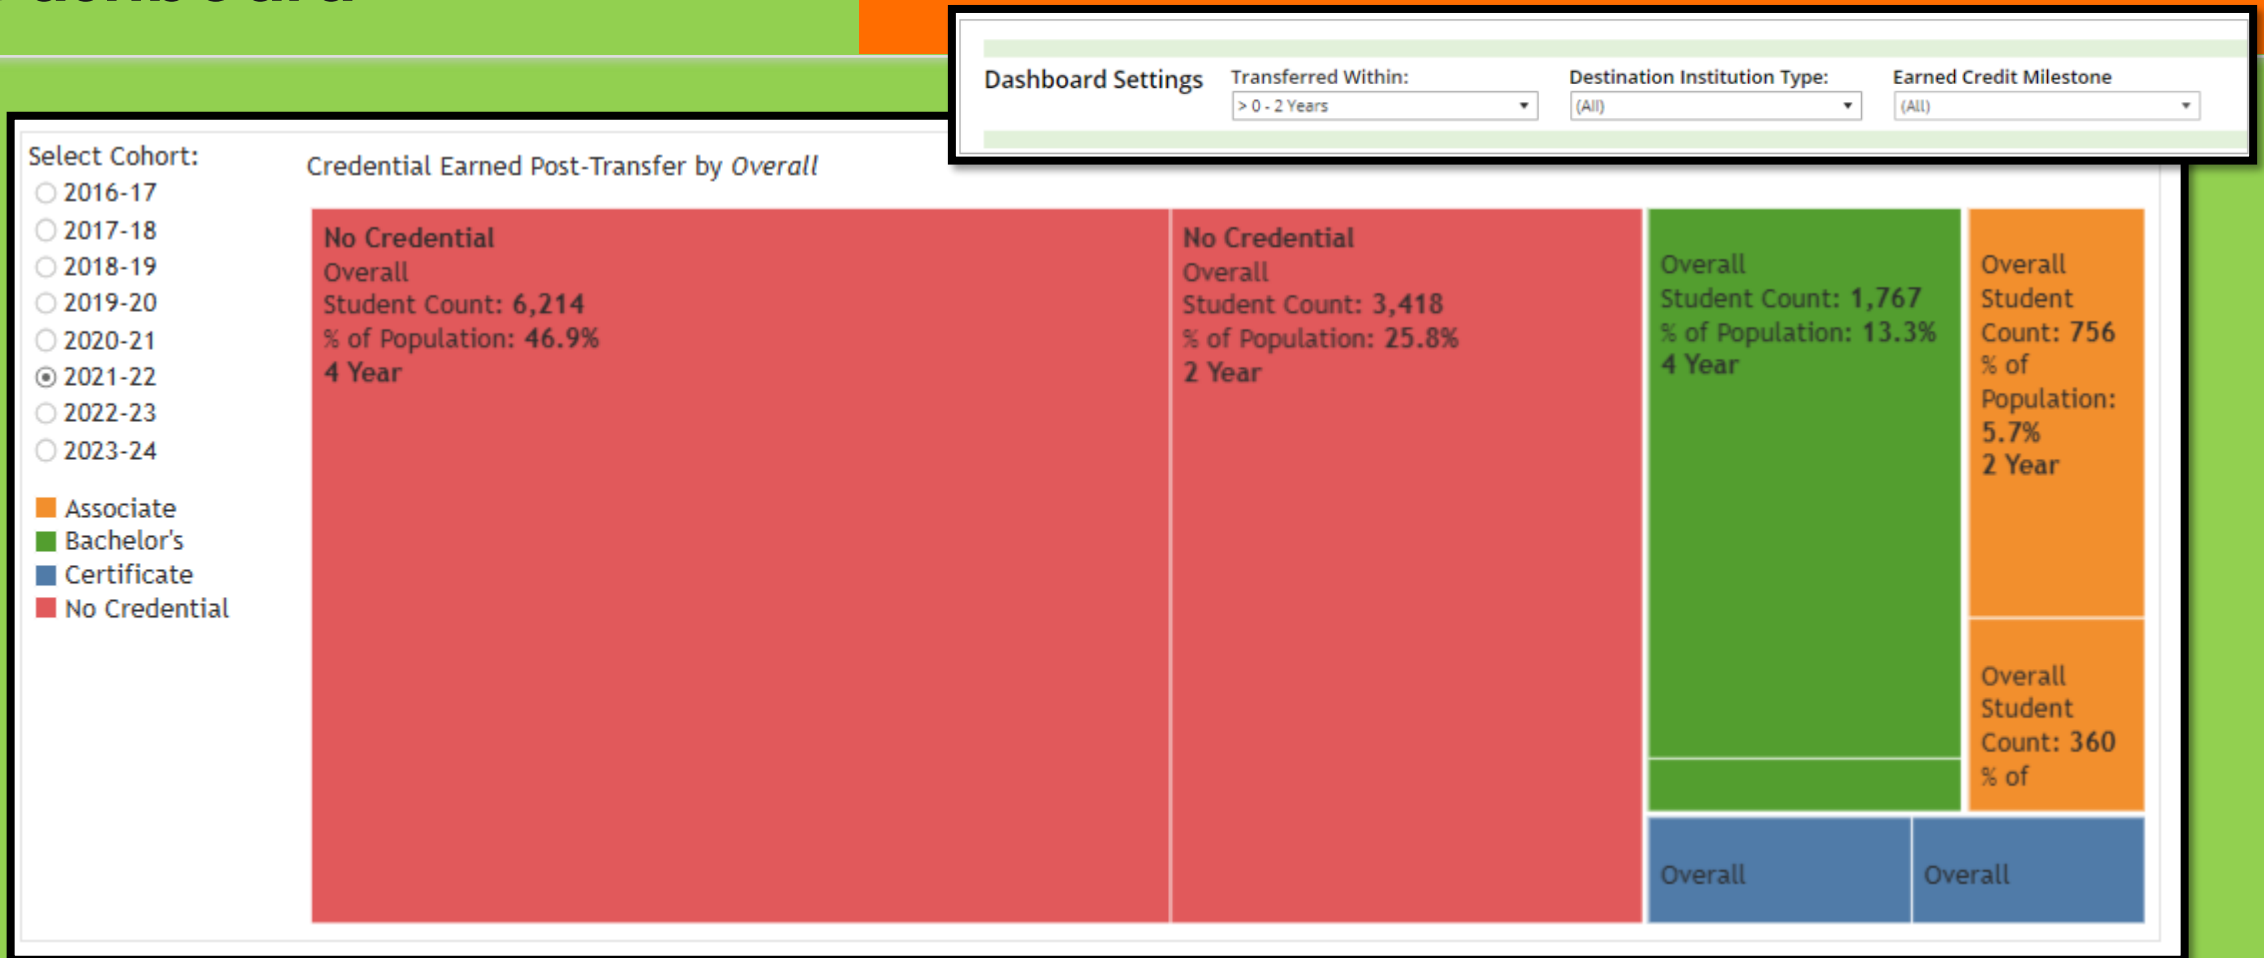

Subgroup Gap Analysis by *First Generation*

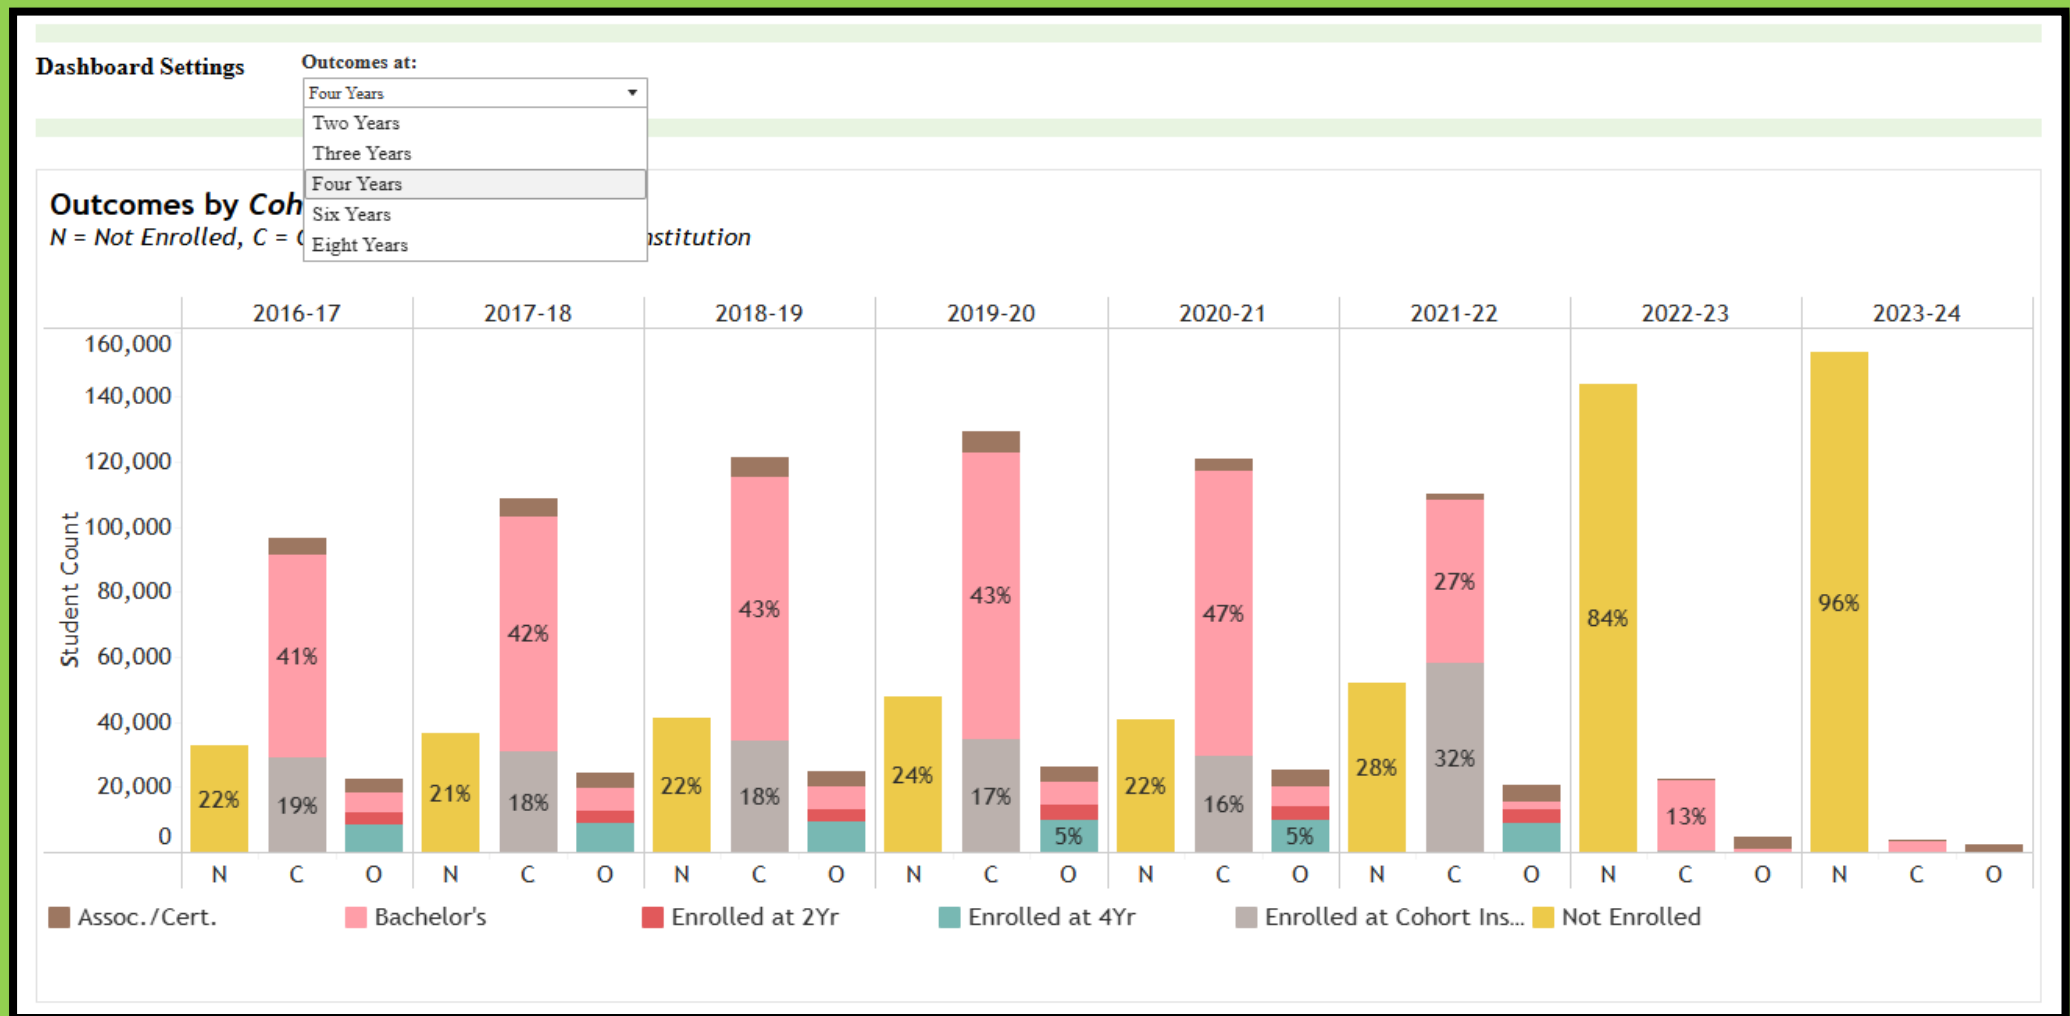

There is a Term to Term Dashboard as well!

The Transfers Dashboard

The dashboard includes information on transfer students who earned a certificate, associate degree, or bachelor's degree or did not earn a credential before or after transfer. It also displays your institution's overall transfer rate.

The Outcomes Dashboard

- The dashboard displays outcomes for up to eight cohorts of students of multiple credential types within timeframes selected.
- This includes credentials a student received from either your institution or another institution. 19

Six Year Outcomes by Attendance for Cohort Year 2018-19

The Time to Credential Dashboard

- This dashboard displays the full range of undergraduate credential levels offered by your institution across the six most recent academic years.
- This dashboard is based on the academic year in which each credential was awarded, unlike the other dashboards, which are cohort based.

Disaggregate and dig into the data

SMART Goal Framework

- **Specific:** What exactly are you trying to improve?
- **Measurable:** What data will show change?
- **Attainable:** How will this goal be achieved given current capacity and context?
- **Relevant:** How is the goal aligned with student success?
- **Timely:** What is the timeframe?

SMART Goal Worksheet

Specific: What exactly are you trying to improve?

Finding:

Only 45% of first-time Pell students complete gateway math in their first year

Specific:

Focus on gateway math, and first-time Pell students

Get specific, figure out the who's, and the what's:

- Identify your student population of focus, and the metric you are wanting to improve

Measurable: What data will show change?

✓ Good Measurable Indicators from PDP:

- % of students completing 15+ credits in year one
- Retention rate from fall to fall
- Gateway course (math/English) completion in year one
- Credit accumulation by term

✗ Avoid vague outcomes like:

- “Improve student success”
- “Make advising better”

✓ Instead say:

- “Increase gateway math completion from 45% to 48% for first-time Pell students”

Attainable: Is the goal attainable & realistic?

Ask: Can this goal reasonably be achieved with our resources?

Tips to assess attainability:

- Review past PDP trends (is this a 5% jump or 25%?)
- Consider current capacity (staffing, budget, programs)
- Compare to similar institutions if possible

Example:

If gateway math completion has never surpassed 50%, a jump to 90% in one year is **not realistic**.

But increasing from 45% to 60% over two years **with supports** could be.

Relevant & Timely: Is the Goal Relevant & Time-Bound?

Ask:

- Is this tied to a key student success or equity priority?
- Have we defined when the goal will be met?

✅ Relevant Goals:

- Address equity gaps (e.g., retention for Pell students)
- Focus on progression milestones (gateway completion, credit accumulation)

✅ Time-Bound Examples:

- “...by Fall 2026”
- “...within the next three academic years”
- “...by the end of the 2025–26 academic year”

❌ Avoid:

- “As soon as possible”
- “Eventually”
- “Ongoing”

Crafting a SMART Goal Using PDP Data

Finding:

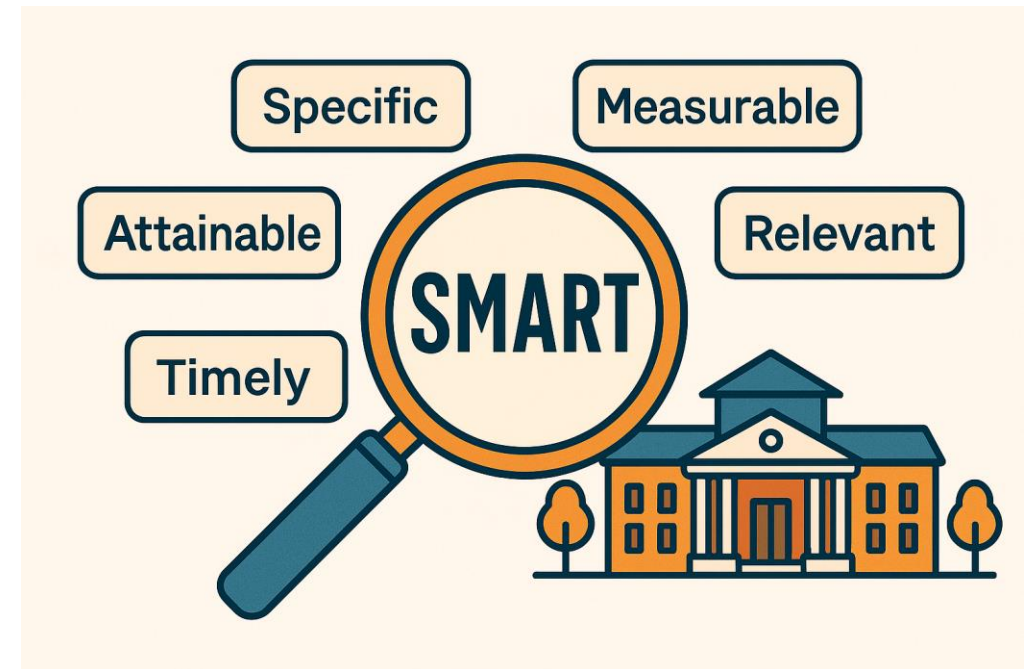

Only 45% of first-time Pell students complete gateway math in their first year

SMART Goal Example:

Increase gateway math completion for first-time Pell students from 45% to 48% by Fall 2027 through expanded corequisite support and targeted advising interventions.

How can you leverage the PDP?

- If you had access to your PDP data right now, which student outcome would you look up first? Why?
- What is one outcome on your campus that you think could be realistically improved with a focused initiative and the right resources?
- Imagine you're writing a goal to be accomplished by Fall 2026. What change would be most meaningful for your department or team to achieve by then?
- What's one challenge your students face where a clear, time-bound improvement goal could help guide action and accountability?

Meow Wolf

- Shuttle pick up 5:45 at the hotel lobby. We will have one shuttle running
- It is about a 20-minute walk
- Don't forget your wristband and drink tickets. The wristband is mandatory for entrance
- Dinner will be provided
- Dress is casual, we encourage comfortable shoes for walking around the exhibit
